Development Planning  
Zanzibar

March, 2013

## Foreword

---

The 2012 Population and Housing Census (PHC) for United Republic of Tanzania was carried out on the 26<sup>th</sup> August, 2012. This was the fifth Census after the Union of Tanganyika and Zanzibar in 1964. Other Censuses were carried out in 1967, 1978, 1988 and 2002. The 2012 PHC, like others, will contribute to the improvement of quality of life of Tanzanians through the provision of current and reliable data for development planning, policy formulation and services delivery as well as for monitoring and evaluating national and international development frameworks.

The 2012 PHC is unique in the sense that, the information collected will be used in monitoring and evaluating the Development Vision 2025 for Tanzania Mainland and Zanzibar Development Vision 2020, Five Year Development Plan 2011/12 – 2015/16, National Strategy for Growth and Reduction of Poverty (NSGRP) commonly known as MKUKUTA and Zanzibar Strategy for Growth and Reduction of Poverty (ZSGRP) commonly known as MKUZA. The census will also provide information for the evaluation of the Millennium Development Goals (MDGs) in 2015. The Poverty Monitoring Master Plan, which is the monitoring tool for NSGRP and ZSGRP, mapped out core indicators for poverty monitoring against the sequence of surveys, with the 2012 Census being one of them. Several of these core indicators for poverty monitoring will be measured directly from the 2012 Census. The census will also provide a denominator for the determination of other indicators such as enrolment and literacy rates, infant and maternal mortality rates, unemployment rate and others.

The General Report on Population Distribution by Administrative Units is the first of a series of publications planned for the 2012 PHC. The main purpose of the report is to give aggregated totals of population by sex. The report will also provide number of households, average household size, population densities, average annual inter-censal growth rates and sex ratios. Levels of aggregation are national, regional, district council and ward/*shehia*.

The success of the census depended upon the cooperation and contributions from the government, development partners, various institutions and the public at large. A special word of thanks should go to the government leaders at all levels particularly, Minister for Finance; Minister of State, President's Office, Finance, Economy and Development Planning, Zanzibar; Members of Parliament; Members of House of Representatives; Councilors; Regional and District Census Committees chaired by Regional and District Commissioners; Field Assistants; Enumerators; Supervisors; local leaders and heads of households.

Our special gratitude should go to the following; DfID, Government of Japan, JICA, UNDP, UNFPA, UNICEF, USAID, World Bank and other development partners for providing assistance in terms of equipment, long and short term consultancies, training and funding. We would like to thank

religious and political party leaders, as well as Non-Governmental Organisations (NGOs), mass media and the general public for their contribution towards successful implementation of the census.

Last but not least, we would wish to acknowledge the vital contributions to the project by Hajjat Amina Mrisho Said, the 2012 Commissioner for Population and Housing Census and Mr. Mwalim Haji Ameir, the Census Commissar for Zanzibar. Special thanks should also go to the Management and staff of the National Bureau of Statistics and Office of Chief Government Statistician, Zanzibar. Their commitment and dedication made significant contributions to the overall efficiency of the census operations. We would also like to convey our appreciation to all other Government Officials who worked tirelessly to ensure successful implementation of the 2012 Population and Housing Census.

A handwritten signature in blue ink, appearing to read 'M. Pinda'.

Hon. Mizengo Peter Pinda (MP),  
Prime Minister, United Republic of Tanzania

A handwritten signature in black ink on a yellow background, appearing to read 'Seif Ali Iddi'.

Hon. Ambassador Seif Ali Iddi (MP/MHR),  
Second Vice President, Zanzibar

## Concepts and Definitions

---

**Household** refers to a person or group of persons who reside in the same homestead/compound but not necessarily in the same dwelling unit, have same cooking arrangements, and are answerable to the same household head.

**Average household size** is calculated by dividing the total number of persons by the total number of households in a given population.

**Sex ratio** is the ratio of males to females in a given population usually expressed as the number of males for every 100 females. For example, sex ratio of 98 for Katavi region means, for every 100 females, there are 98 males.

**Population density** refers to the number of people living in a given area usually expressed as people per square kilometre.

**Population growth** refers to the change in population over time, and can be quantified as the change in the number of individuals in a population using "per unit time" for measurement.

**Population growth rate** is the fractional rate at which the number of individuals in a population increases. Specifically, population growth rate ordinarily, refers to the change in population over a unit time period, often expressed as a percentage of the number of individuals in the population at the beginning of that period. Growth rate in this book is expressed as an exponential rate of growth of population from year 2002 to 2012.

## Section A: Summary of Findings

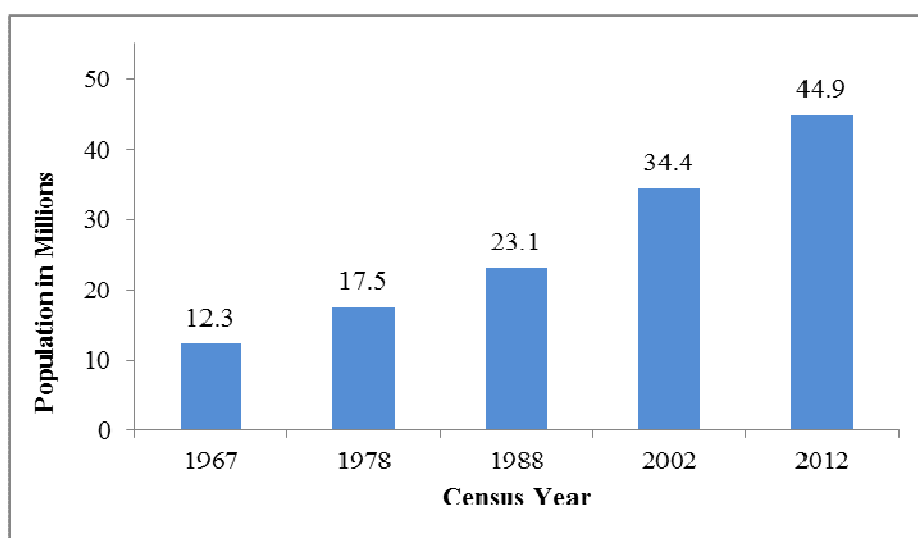

### 1.0 Introduction

This section presents summary of findings of the 2012 PHC. These include number of persons by region, average annual population growth rates, average household size, population densities and sex ratios.

### 1.1 Number of Persons

The 2012 PHC revealed that, the population of Tanzania has grown from 12,313,469 persons in the 1967 Census to 44,928,923 persons counted in 2012 as shown in Figure 1.

**Figure 1: Population Trends in Tanzania, 1967 – 2012 Censuses**

The population of Tanzania has more than tripled from 12.3 million in 1967 to 44.9 million in 2012

### 1.2 Population by Region

The United Republic of Tanzania is a union of Tanganyika (Tanzania Mainland) and Zanzibar (Tanzania Zanzibar). Administratively, Tanzania has 30 regions (25 in Tanzania Mainland and 5 in Tanzania Zanzibar). Table 1 shows regional populations during the 2002 and 2012 censuses and their intercensal growth rates. In the 2012 Census, Dar es Salaam was found to have a population of 4.36 million accounting for 10 percent of the total Tanzania Mainland population. Regions with a population of over 2 million were Mwanza (2.77 million), Mbeya (2.71 million), Kagera (2.46 million), Tabora (2.29 million), Morogoro (2.22 million), Kigoma (2.13 million), Dodoma (2.08 million) and Tanga (2.05 million). In Tanzania Mainland, there were four regions with a population of less than one million. These were Katavi (564,604), Njombe (702,097), Lindi (864,652) and Iringa (941,238).

Dar es Salaam accounts for 10 percent of the total Tanzania Mainland population

In Tanzania Zanzibar, the region with the largest population was Mjini Magharibi (593,678) which accounts for 46 percent of the total population of Tanzania Zanzibar. The region with the smallest population was Kusini Unguja with a population of 115,588.

In ten years (2002 to 2012), the population of Tanzania increased by 30 percent from 34.4 million to 44.9 million

**Table 1: Population by Region and Average Annual Growth Rate, 2002 and 2012 Censuses**

Region	Population (Number)			Population Increase	Average Annual Rate (Percent)	
	2002 Census Counts	2012 Projected Population	2012 Census Counts	2002 - 2012 (Number)	1988-2002	2002-2012

Note: N/A stands for Not Applicable

<sup>2</sup> Njombe was part of Iringa and the 2012 projected population of Iringa region includes that of Njombe region

<sup>3</sup> Katavi was part of Rukwa and the 2012 projected population of Rukwa region includes that of Katavi region

<sup>4</sup> Simiyu was part of Shinyanga and Mwanza and the 2012 projected population of Shinyanga and Mwanza include that of Simiyu

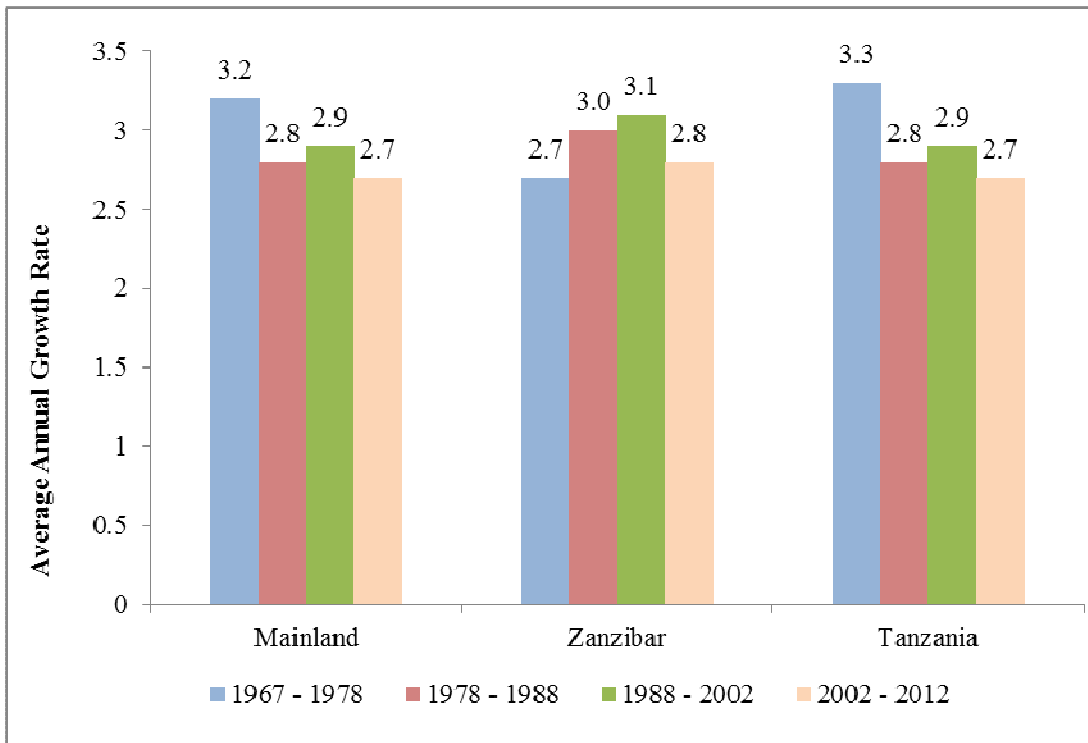

<sup>5</sup> Geita was part of Shinyanga, Mwanza and Kagera and the 2012 projected population of Kagera, Mwanza and Shinyanga includes that of Geita

### 1.3 Average Annual Growth Rates

In Tanzania, the population growth rate has declined from 3.3 percent in 1967 to 2.7 percent in 2012. Tanzania Mainland shows a decline from 3.2 percent in 1967 to 2.7 percent in 2012. Tanzania Zanzibar shows a different pattern of growth. The growth rate increased from 2.7 percent in 1967 to 3.1 in 2002 and then declined to 2.8 percent in 2012 (Figure 2).

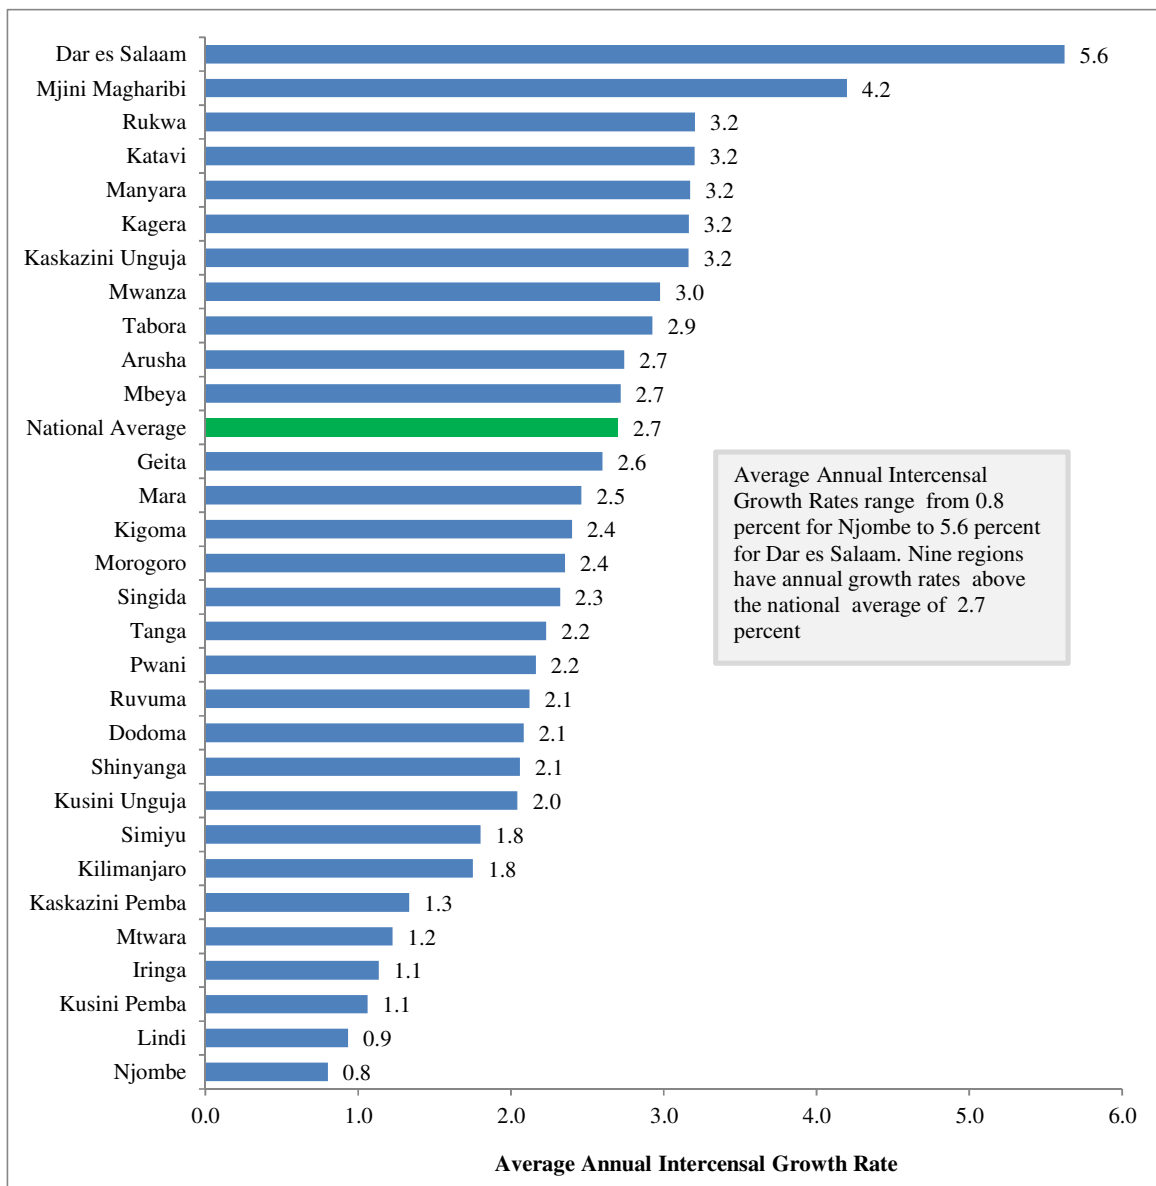

At the current growth rate of 2.7 percent, the population of Tanzania will double in the next 26 years

**Figure 2: Average Annual Intercensal Population Growth Rates, 1967 – 2012 Censuses**

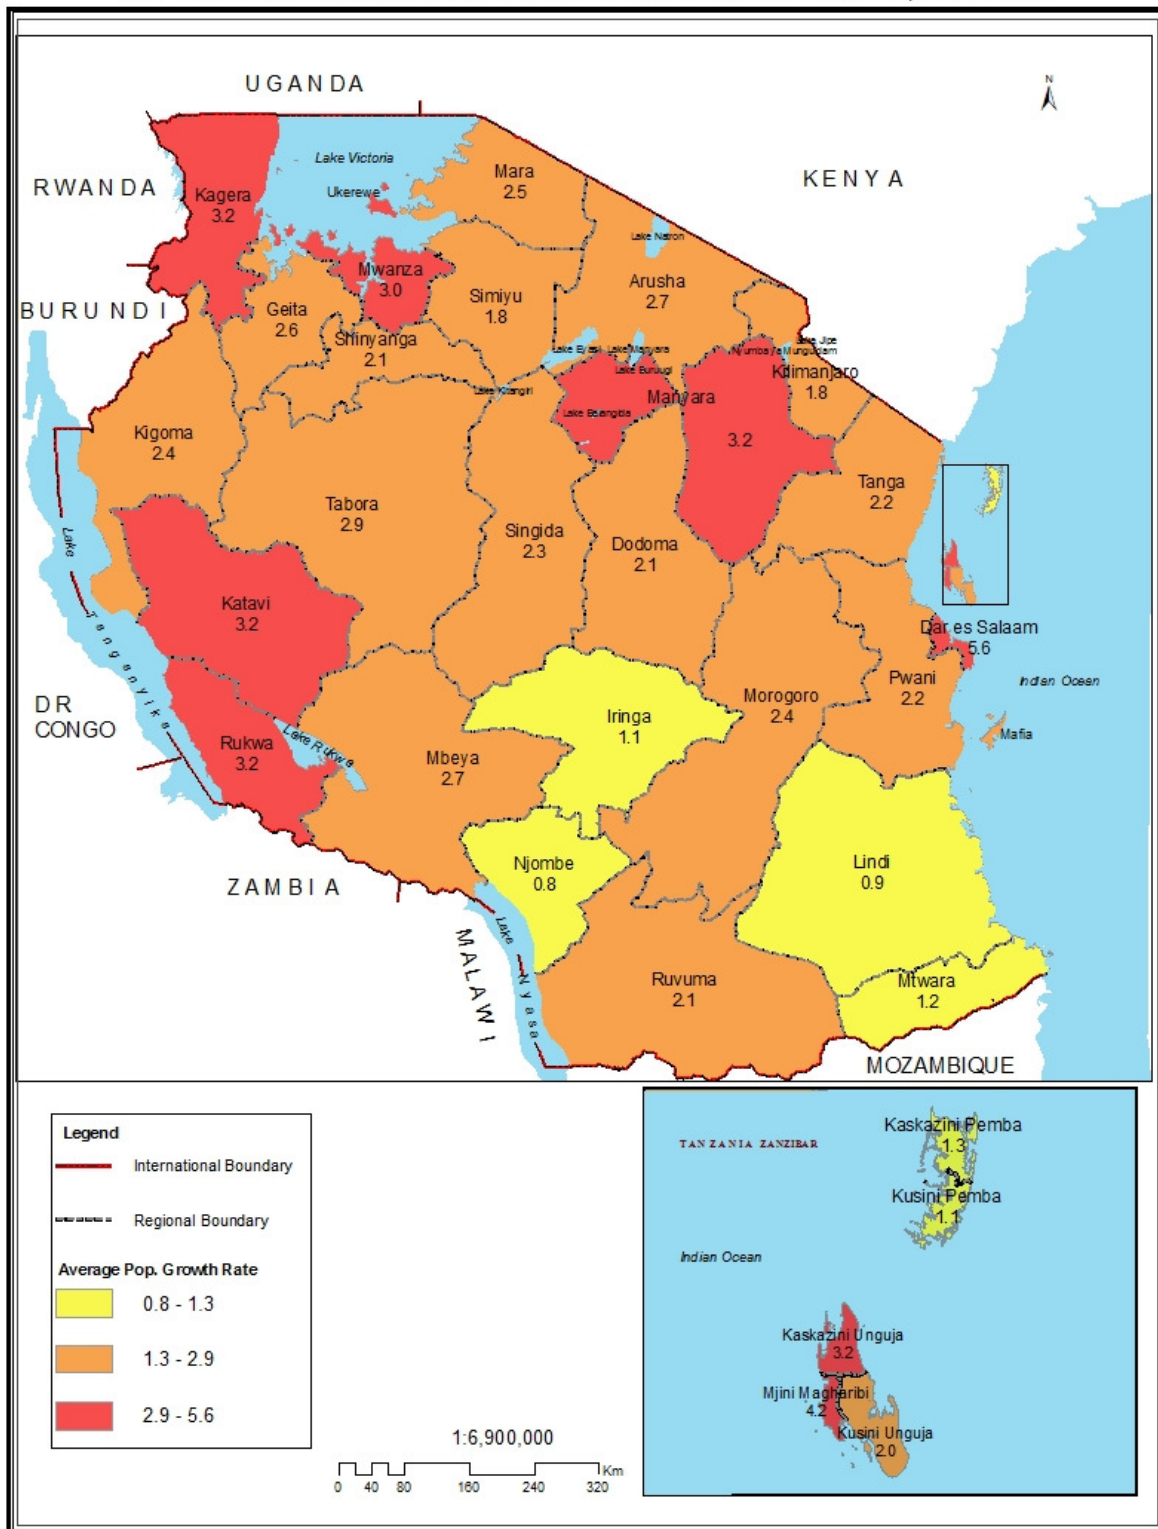

The average annual growth rates vary from region to region (Figure 3 and Map 1). The average rates of growth for the period of 2002 to 2012 range from 5.6 percent recorded in Dar es Salaam region to 0.8 percent recorded in Njombe. Regions dominated by large urban populations recorded the highest growth rates. These are Dar es Salaam (5.6 percent) and Mjini Magharibi (4.2 percent).

**Figure 3: Average Annual Intercensal Population Growth Rate by Region, 2002 – 2012 Censuses**

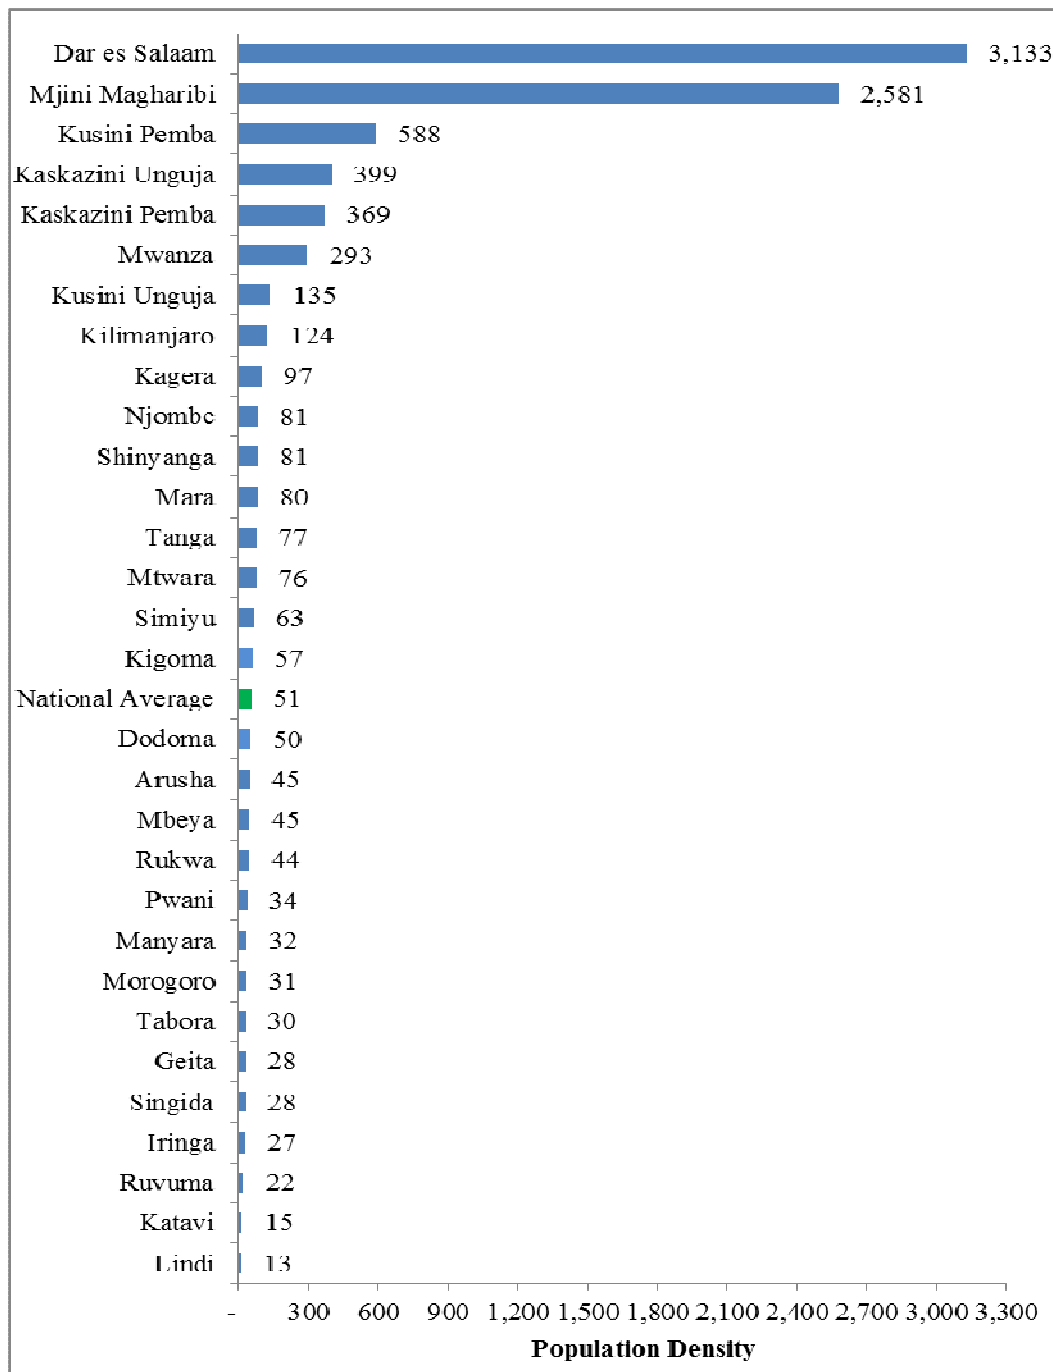

**Map 1: Average Annual Population Growth Rate by Region, 2002 – 2012 Censuses**

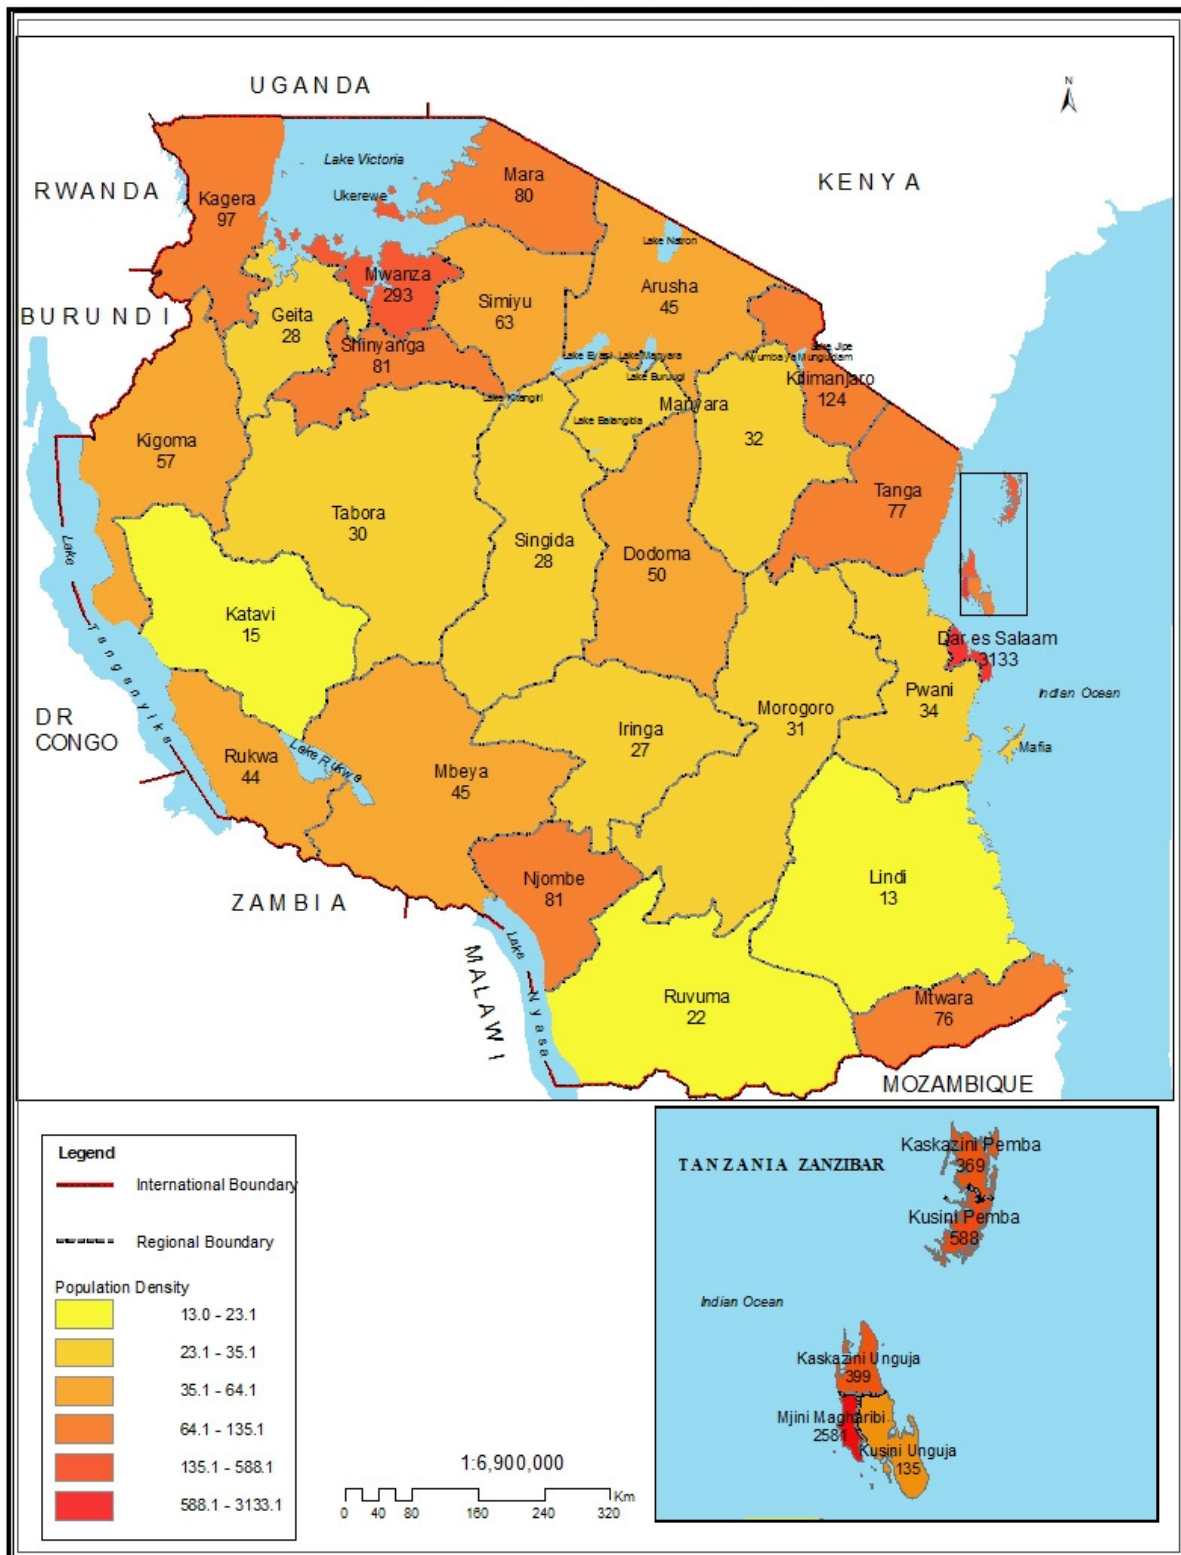

## 1.4 Population Density

Tanzania is sparsely populated with population density of 51 persons per square kilometre with variation across regions (Figure 4 and Map 2). Persons are concentrated in Dar es Salaam and Mjini Magharibi regions with population densities of 3,133 and 2,581 persons per square kilometre respectively. Regions with lowest population densities are Lindi (13 persons per square kilometre) and Katavi (15 persons per square kilometre).

**Figure 4: Population Density by Region, 2012 Census**

Map 2: Population Density by Region, 2012 Census

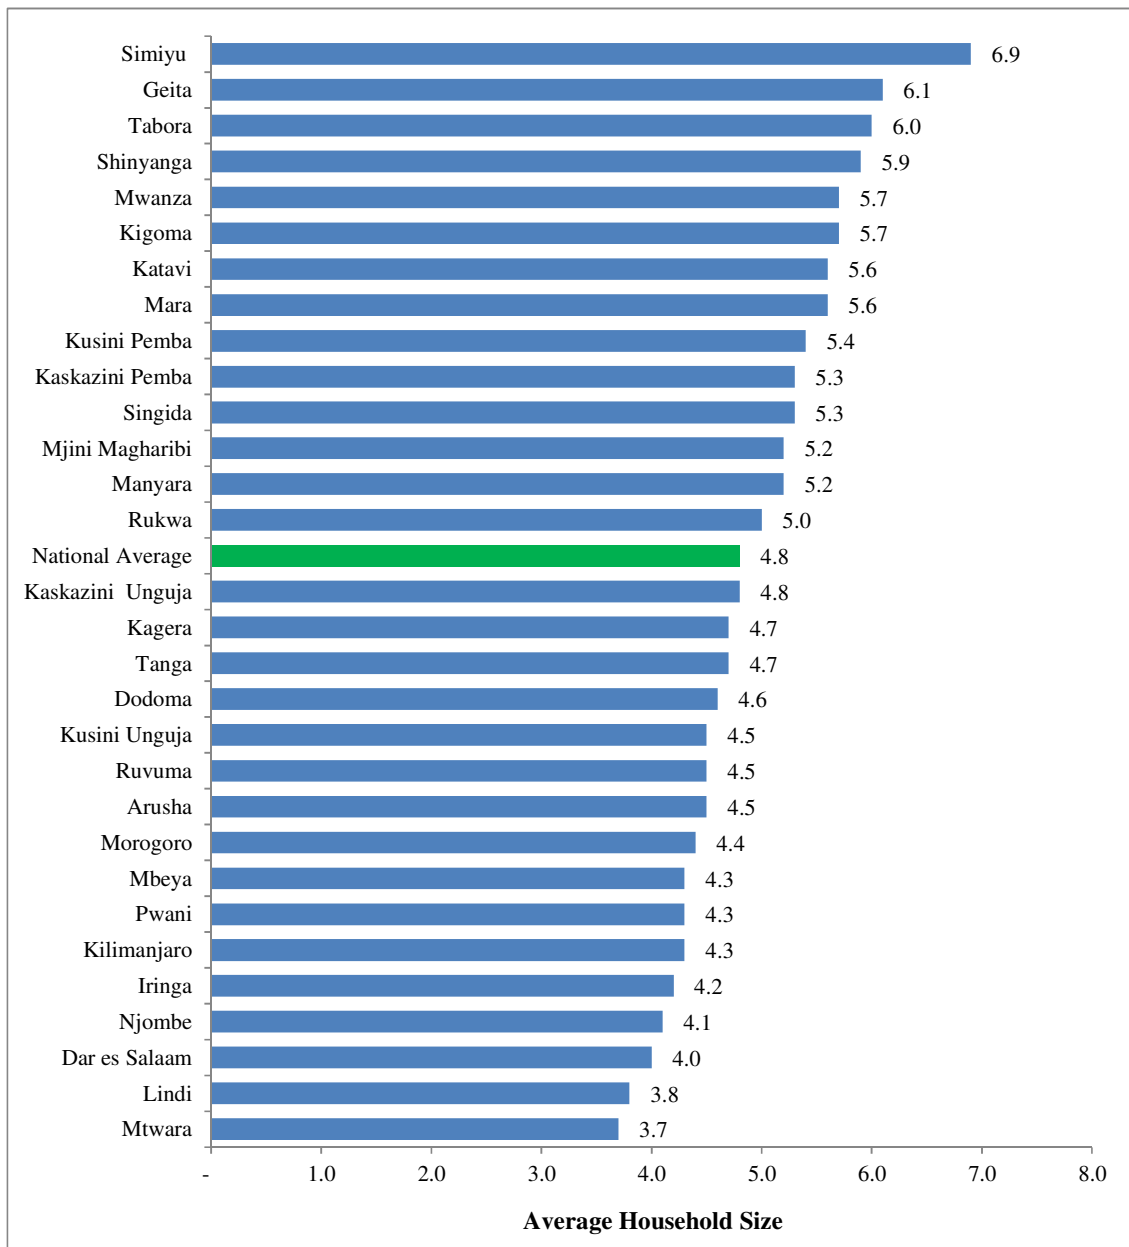

## 1.5 Household Size

The average household size in Tanzania remained almost constant between 2002 and 2012 Censuses. Average household size was found to be 4.9 persons per household in 2002 and 4.8 in 2012.

The average household size varies among regions. Fourteen regions recorded an average household size that was above the national average of 4.8 persons per household. Mtwara region recorded the lowest average household size of 3.7 (Figure 5).

**Figure 5: Average Household Size by Region, 2012 Census**

**Table 2: Average Household Size by Region, 2002 and 2012 Censuses**

Region	2002 Census			2012 Census

## 1.6 Sex Ratio

The sex ratio of Tanzania and Tanzania Mainland were both 95 males per 100 females while that of Tanzania Zanzibar was 94. Sex ratios varied among regions from 88 males per 100 females in Njombe region to 101 in Manyara, with the majority of regions having sex ratios from 92 to 95 males per 100 females (Figure 6).

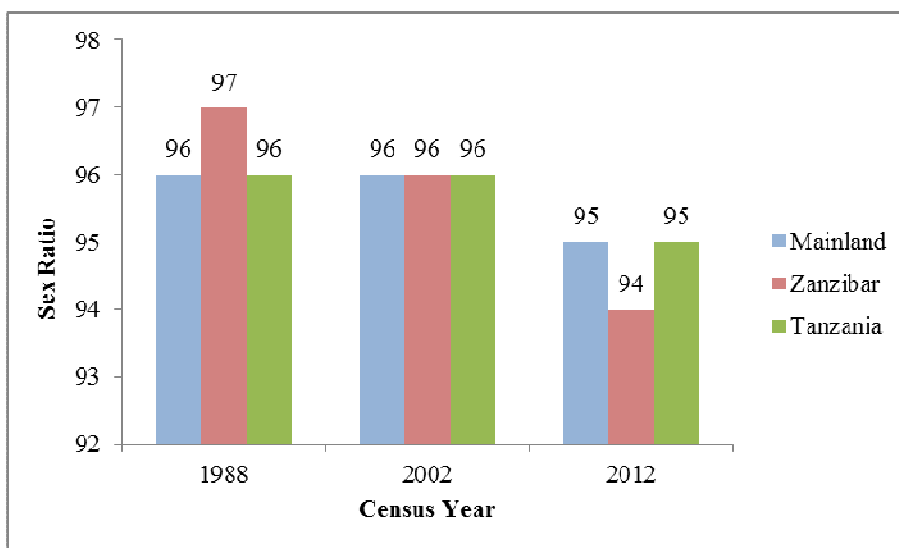

The 2012 Census results revealed that, 51 percent of Tanzanians were females and 49 percent were males. This is a common pattern in most African Countries

**Figure 6: Sex Ratio by Region, 2012 Census**

Trends in sex ratio between 1988 and 2012 Censuses show that, there were more females than males in the population, both in Tanzania Mainland and Tanzania Zanzibar (Figure 7).

**Figure 7: Trends in Sex Ratio, 1988 – 2012 Censuses**

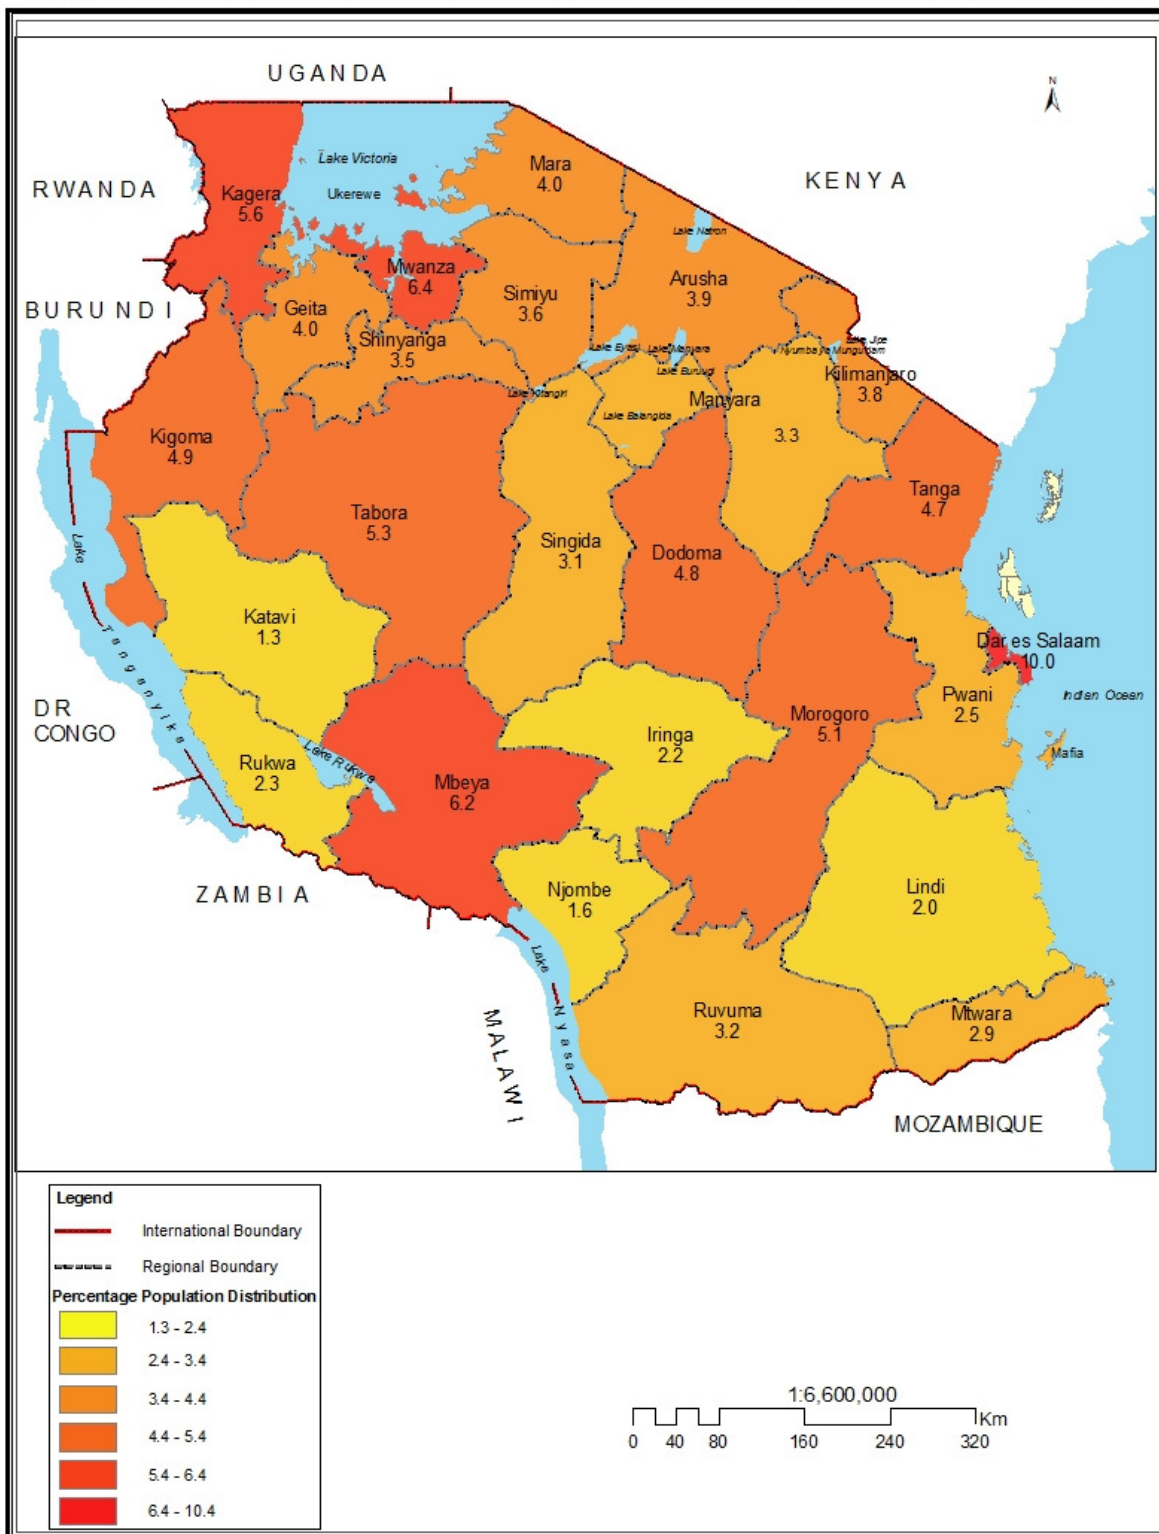

### **1.7 Regional Population Distribution**

Population size varies across regions both in Tanzania Mainland and Tanzania Zanzibar. In Tanzania Mainland, Dar es Salaam shows high proportion with 10 percent of overall Mainland population followed by Mwanza region with 6.4 percent. Nine regions have proportions ranging from 4.0 to 6.2 percent. The regions with the least population share of less than 2 percent are Katavi (1.3 percent) and Njombe (1.6 percent) (Map 3).

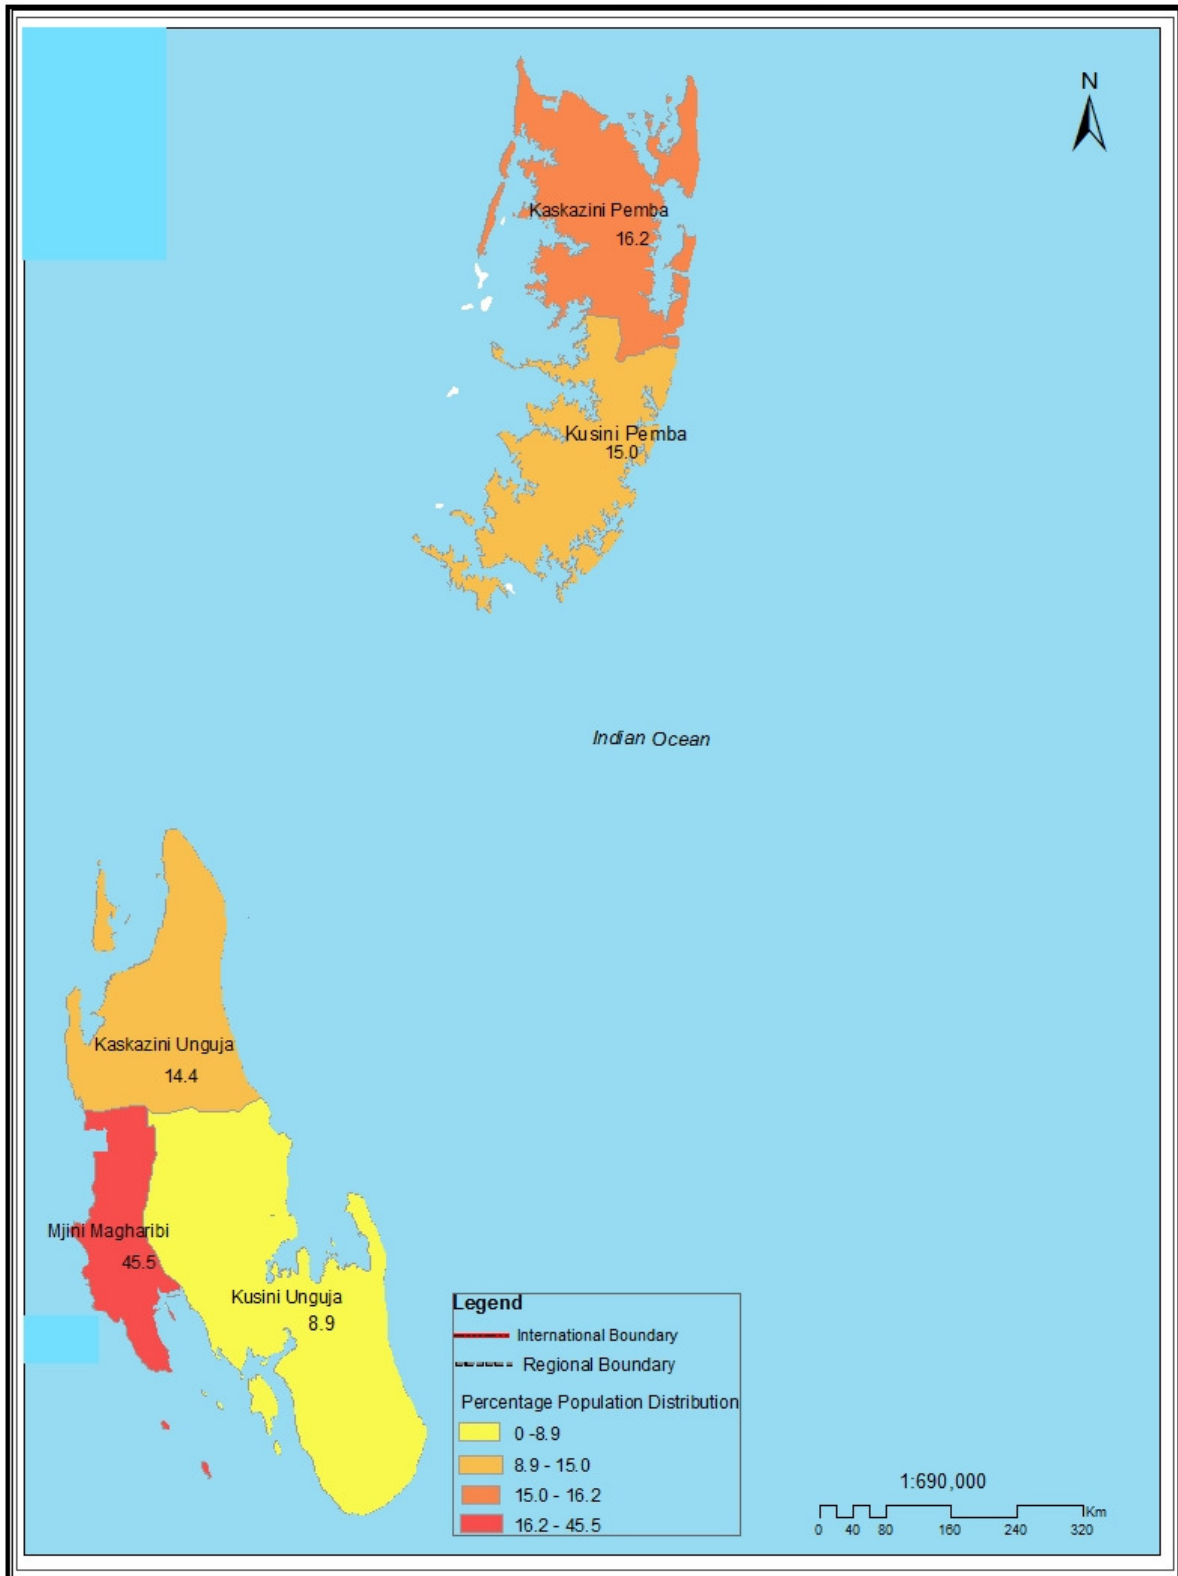

In Tanzania Zanzibar, about half of the population resides in Mjini Magharibi which accounts for 46 percent while the region with the least share of population is Kusini Unguja (8.9 percent) (Map 4).

# Section B

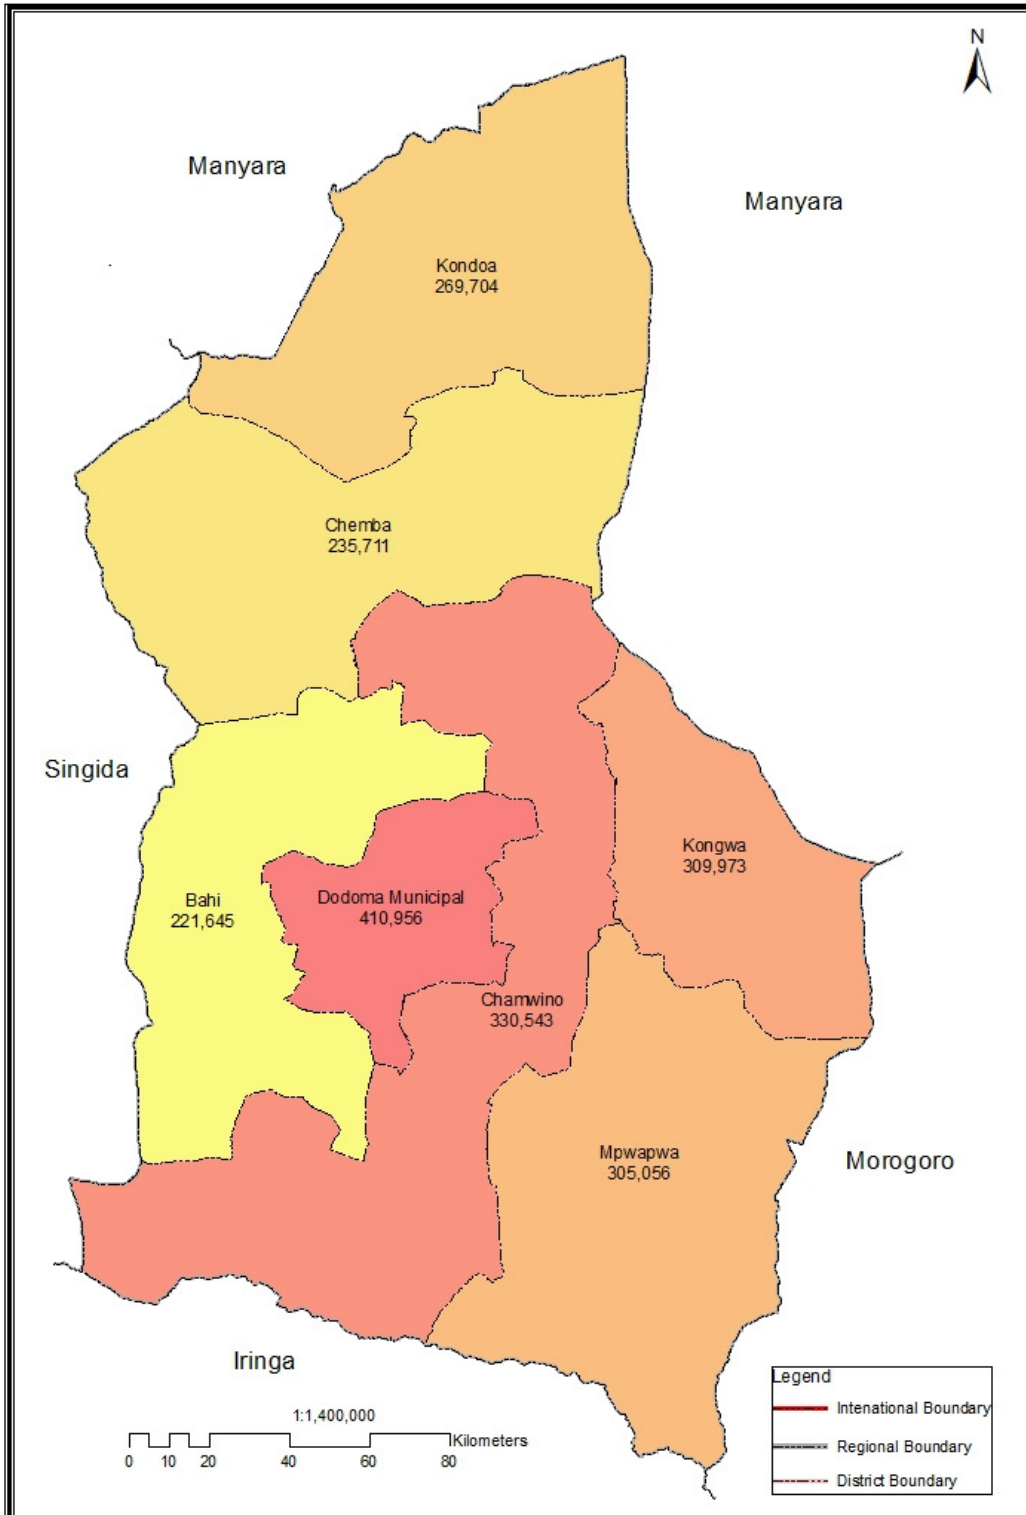

---

## Population in the Regions, District Councils, Wards/*Shehia* by Sex, Average Household Size and Sex Ratio

This Section presents population by Sex, Average Household Size and Sex Ratios for each region by means of maps and tables. Each regional map shows population distribution by district. During the cartographic preparations for the 2012 PHC, all villages/*mitaa*, wards/*shehia* and districts councils were mapped to facilitate census operations and data dissemination.

It will be observed that, a few district councils are formed by two polygons which are separated by urban authorities or neighbouring district councils. These district councils include Gairo in Morogoro Region, Masasi in Mtwara Region, Mbeya in Mbeya Region, Uyui in Tabora Region and Kahama in Shinyanga Region. However, it should be noted that, the maps presented in this Section are for statistical purposes only.

DODOMA: POPULATION DISTRIBUTION BY DISTRICT/COUNCIL - 2012
